FEATURED PROJECTS

Website Portfolio

React · Vite · GSAP · EmailJS

- Developed a responsive portfolio website to showcase my profile, skills, and projects, with animations and interactive UI for an engaging and easy-to-navigate experience.
- Integrated the contact form with EmailJS and structured the site with reusable React components for easier maintenance and future updates.

Web-IDS

Python · Flask · Scikit-learn · SQLite

- Developed a Web Intrusion Detection System using Machine Learning to analyze HTTP payloads and detect attack patterns such as SQL Injection and XSS.
- Built APIs and a dashboard for analyzing, logging, and monitoring security events, with the system prepared for cloud deployment.

Calcu

AI Calorie Tracker · Next.js · TypeScript · Tailwind CSS · Prisma · Gemini AI

- Developed a PWA for tracking calories, macronutrients, and body weight, with a dashboard to monitor progress against daily goals.
- Integrated Gemini AI to analyze food images and estimate calories, protein, carbs, and fat, with Thai/English support and authentication.

20 Shop

Online Football Jersey Store · HTML · Tailwind CSS · JavaScript

- Developed a mock online football jersey store for a university mini project, including product listing, product details, and shopping cart pages.
- Managed cart data in the browser using LocalStorage, with total price calculation and item removal functionality.
